Abu Dhabi Time by Farag Sensei

September 5th

This is the third time of Abu Dhabi Meeting. It was an interesting story that the reason why Mr.Farag who didn't want to become a teacher then became a teacher.

He took a Japanese class that seems to be the least likely to become a school teacher. After that, he had the opportunity to work with people from a Japanese company and decided to go to Japan. He had a lot of experience in Japan, but he was stumped by the Japanese toilet and was bothered by frequent earthquakes.

Mr. Farag has long been involved in the operation of this Japanese school. Thanks to his encounter with Japanese language that help us to exchange our information and knowledge, we can now enjoy our school life safely and happily.
